Description

Agilent G1888 Headspace Sampler

The Agilent G1888 Headspace Sampler lets you automatically introduce volatile compounds from virtually any sample matrix directly into a GC or GC/MSD system. It features an inert sample pathway for superior chemical performance without analyte degradation or loss. And its high sample capacity and increased sensitivity ensure excellent performance for a wide range of analysis.

The G1888 Headspace Sampler is the perfect companion for Agilent 7890A, 6890, 5975C, or 5973 GC / MSD system.

Features:

- 70 Sample Tray & 12 heating oven positions
- Equilibration temperature of up to 230°C
- Multiple headspace-extraction
- Multi-line display and 19 key keypad
- Pressure control for the fixed volume sample loop
- Secure LAN-based instrument communications
- **NINETY (90) DAY WARRANTY**

One (1) Year Warranty Available
